Friday 30<sup>th</sup> September 2016.

Dear Parent/Carer,

I am writing to inform you that we have had two reports of chickenpox.

Chickenpox is a contagious illness caused by a virus. It is transmitted by person to person contact or through the air by coughing or sneezing. The most common symptoms of chickenpox are rash, fever, coughing, headache and loss of appetite. The rash first appears as many small, itchy red bumps which turn in to blisters, emerging in several successive "crops". Chickenpox last around five to ten days.

Please consult your doctor if you believe your child has chickenpox.

Yours sincerely

Andrew Henderson  
**Headteacher**
